

PRODUCT COMPARISON

Only HandPlan Hi-Rise: NYC provides all of these features . . .

Designed specifically for requirements of FDNY’s Combined Fire Safety & Evacuation and Emergency Action Plan

Able to record and monitor administrative and training requirements as required by FDNY Combined Fire Safety & Evacuation and Emergency Action Plan

Able to print FDNY reports, in FDNY format

No need to “buy” additional information, plans, diagrams or services; can use existing FS/EAP information

Powerful interactive database; when contact, building, checklist, diagram and document information is changed, it synchronizes immediately with all user mobile devices

A management tool: can access multiple buildings at the same time from within the app

100% user-controlled data; no need to for a vendor to enter or change your information

Unlimited diagrams, images and documents

All Hazards – All the Time®; stores information on the mobile device, available even when communications systems are down

User ability to create and modify checklists for preparedness, response and disaster recovery tasks

Designed for the entire emergency management cycle: preparing for, responding to and recovering from an incident

No other products provide all of these features

HandPlan: puts emergency information into the hands of those who need it ©
